

Access international activity information from a single easy to use GIS browser...

Navisphere
powered by Navigator

Overview

NAVISPHERE is the new INTERNATIONAL PAVILION's activity information browser. NAVISPHERE provides NOC's, Ministries and government agencies a simple, easy to use GIS internet platform for promoting current exploration and development activity and future opportunities.

Powered by petrowEB's ArcGIS Server/Silverlight GIS browser framework, NAVISPHERE provides the user with the most cost-effective and effortless access to activity information worldwide...nothing to install, simply point and click. Additionally, proprietary data as well as other commercial data offerings can be quickly and easily blended and viewed simultaneously in context with the comprehensive data offered within NAVISPHERE.

Benefits

- ▶ Quickly and easily get a global view of worldwide exploration activity from concession status to current/upcoming license round details from a simple internet browser.
- ▶ Powerful, easy to use GIS interface for graphically locating and viewing structured and unstructured information in spatial context.
- ▶ Flexible subscription options to accommodate a wide variety of business models.
- ▶ Comprehensive petroleum activity information, directly from NOC's, Ministries, government agencies and numerous industry sources.

Subscription Service

Data provided within NAVISPHERE is updated on a continuous daily basis. Because NAVISPHERE is a "cloud based" service accessed by the internet. That means no data imports or software updates are required. A variety of subscription options are available on both regional and worldwide basis to provide users of all levels the most cost-effective solution in the industry.
